Call for Applications

Be a STAGE Fellow

If you are an enthusiastic and inquisitive PhD student, post-doctoral or clinical fellow, with interests in:

- Quantitative Methods
- Genetics and Biology
- and Population Health

STAGE is for you !!!

Program Highlights

✴ Partial stipends for PhD students.
✴ Travel awards to support trainees at scientific meetings and conferences.
✴ Cross-training and co-mentorship in 3 disciplines: Statistics, Genetics, and Epidemiology
✴ An integrative and cross-disciplinary curriculum including courses and journal club
✴ International speaker seminar series, skills workshops, networking events, and professional development activities.

Training Environment

Builds on:

✴ Toronto’s critical mass of genetic epidemiologists and statistical geneticists
✴ The collaborative team of biomedical scientists from the large Toronto Academic Health Science Network
✴ Three well-established and quantitatively strong University of Toronto graduate programs: Epidemiology, Biostatistics & Statistics

Eligibility

✴ PhD students enrolled in Epidemiology, Biostatistics, or Statistics programs at University of Toronto
✴ Exceptional PhD students enrolled in relevant biomedical programs at University of Toronto, with a background in human genetics and evidence of training and strength in quantitative skills
✴ Post-doctoral fellows from relevant disciplines
✴ Faculty transitioning into the fields of genetic epidemiology or statistical genetics.
✴ Must reside in Toronto while a trainee in STAGE

Canadian & international applicants are welcome !!!
